

DSL za skriptovanje survival-horror scenarija

- Domenski specifičan jezik za opisivanje scenarija
- Fokus na dogadjaje, progresiju i stanje igre

Domen i motivacija

- Event-driven gameplay
- Ograničeni resursi
- Uslovljeni prolazi i puzzle-ovi

Problemi koje jezik automatizuje

- Ključevi i vrata
- Puzzle uslovi
- Trigger-i
- Encounter-i
- Upravljanje resursima

Ključni jezički elementi

- room, door, object
- item, flag, var
- on enter / inspect / use
- say, set, unlock, if

Semantika jezika

- Imperativna + event-driven
- Globalno i dimaničko stanje
- Implicitni tipovi, bez castovanja

Primeri DSL skripta

Key + door gating

```
item key "Rusty Key"

room foyer "Foyer":
  door exit -> hall locked requires key

  on enter:
    say "The exit door is locked."

  on inspect door:
    if not has(key):
      say "It won't open without a key."
```

Puzzle flag / stanje

```
flag power = false

room control "Control Room":
  object generator "Power Generator"

  on inspect generator:
    say "The generator is silent."
    if not power:
      flag power = true
      say "The lights turn on."
```
